condition of market prices will even better financial results. While it is not yet safe to say, it is difficult to remark the subject without to think that up to date the Edmonton district has suffered practically all of crop from hail or other storms, and not to mention the heavy grain and wet weather there is a very little grain. While the crop is heavier it will cost less to harvest in recent years, and therefore will be more profitable to the farmer.

AS TO AUDITING AND AUDITING

The disapproval of the city auditor or of the appointment of his successor brings into the limelight a position in civil affairs of which the public have heard little and known less. And yet the duties of the auditor affect the very root of the city's finance. There is, of course, a difference between auditing and audit, and an audit may be an exact verification of figures, and yet be of little practical value. An audit to be really useful must take account of value received as well as of money expended. In order that it may be done it has been found necessary in the finances of the Dominion of Canada to establish the position of Auditor General on the authority of such a majority of Parliament as renders the office independent of control by the Government of the day. This system was adopted many years ago, and under succeeding administrations it has been confirmed and approved. If the city auditor is absolutely under control of the city council or commissioners, he is not in a position to function as an audit as to proper distribution of monies, or as to value received. Of course, he can at any time resign if he does not want to be in a position to do so, but to do, by which they have engaged him and pay him. But why should he?

In the case of the Auditor General of Canada, while the Government cannot control his action by order-in-council—i. e., by taking public and social responsibility upon him, he can override him. There is, therefore, no possibility of a deadlock occurring; while there is at all times an absolute fixing of responsibility.

Having in mind the number of audits of several municipalities in the Fort George trade in value in placing an agent at Mile 145 who would see to the proper storage and shipment of Edmonton goods destined for Fort George. Unless this is done, a great deal of extra individual expense will be incurred, and not only in any case, loss from damage or delay will follow. This is a case in which Edmonton merchants will do well to work in cooperation. The possibility of trade in there; the railway has done its part; it now depends on the dealers themselves to do theirs.

HARVEST CONDITIONS

Succeeding the discouraging weather of fair week the Edmonton district has enjoyed for the past fortnight ideal ripening weather. Day after day of clear sky and hot sun has given the tough needed to turn the green into gold, not only as to color, but even more so as to value.

Harvesting is later this year in Edmonton district than through out the greater part of the prairie provinces, but crops are proportionately heavier because of the much stronger and heavier growth that the harvest is later. During the warm weather of fair week the process of filling went forward at a rapid pace, and now the perfecting of the grain in the ripening process is making equal progress. Cutting has been general through out the district but the grain is not as long as it has sometimes been in former years, but seldom has there been a crop which stood so evenly and so thickly on the ground as it has yet too early to predict yields per acre, but, unless all signs fail, this will be a record year in this recent district.

Compared with the purely prairie sections of the West, the wheat area in the Edmonton district is not as large in proportion to that occupied by oats and barley, but with the greater proportion of live stock and the comparatively low price of wheat, the return to the farmer per acre, if he is able to feed his oats and barley, will be much greater than if he were to return to the prairie wheat farmer. The increase in acreage in barley over former years is quite noticeable, indicating that the friend of man and equine of the Edmonton district during trying times in the past, namely the humble but necessary hog, is receiving greater attention than give before, and in the present

CITY BAKERY BREAD

Our Speciality Pure
Rye Bread and
Pompanick.

Now Comes the only part of Our Process that Needs the Hand of Man

This is after the loaf leaves the molding machine and after it is more than halfway to the oven.

It is known in bakers' parlance as panning, and, as you can easily gather, means the putting of the loaf into the pan. After being panned the loaves are put on steel racks and put into the proving room, which is steam-heated up to from 90 to 100 degrees. The heat in this room is automatically regulated, and, with from 30 to 45 minutes' proving your favorite loaf is ready for the oven.

Have you ever thought seriously as to whether or not there is a difference?

If not, order your next bread from

TWO GAMES TODAY AT DIAMOND PARK, FIRST 3 P. M., SECOND 5.45

GRAY BIRDS TURN VICTORY
INTO DEFEAT BY ANTICS
IN EIGHTH INNING LAST P. M.

Understanding on the Part of Both Teams Enrages Fans at the Close of the Eighth Innings in Yesterday's Game

One of the greatest farce comedies seen this year was enacted on the home diamond yesterday during the game between Edmonton and Calgary. The game was a farce from the first to the last. The Gray Birds, who were the home team, came to bat in the eighth inning with a lead of one run. The home team was in a position to win the game, but the Gray Birds, who were the visiting team, turned the game into a farce by committing a series of errors. The Gray Birds, who were the visiting team, committed a series of errors, including a dropped ball, a wild pitch, and a series of errors by the catcher. The Gray Birds, who were the visiting team, committed a series of errors, including a dropped ball, a wild pitch, and a series of errors by the catcher. The Gray Birds, who were the visiting team, committed a series of errors, including a dropped ball, a wild pitch, and a series of errors by the catcher.

"Good to the
Very End!"

Water Supply Dependent Upon Single Intake Pipe

Superintendent Parsons Urges Commissioners to Make Provision for Second Intake—Blocking of Present Intake Would Cut Off Both Water and Power Supply

Warning the city commissioners that if the city's water supply is left dependent upon the present intake, they are in the present position of a possible breaking down, not only of the water supply but also of the electric light and power plant, Superintendent Parsons urged the commissioners to make provision for a second intake pipe, which would be ready for use in case of an emergency at the intake.

The city supply depends at present upon a single intake," he says in his report to the city commissioners, "the cutting of which has given rise to great anxiety on more than one occasion recently. Should this intake become blocked, as happened in the case of the old intake last year, the water supply of the city probably would be cut off altogether for some time and a cessation of water would also cause the electric plant to be shut down."

Mr. Parsons recommends the preparation of plans for a new intake which would be capable of taking in water and cleaning out. This he thinks should be done at once.

At a meeting of the city council

ARE AMERICANS CAPTURING FAR NORTH TRADE?

President Northern Transportation Company Urges Increased Facilities From Edmonton

SAYS AMERICANS TAKE HALF OF THE FUR CATCH

Americans Have Advantage by Reason of Going Into Country by Behring Straits

City Engineer Lateral has submitted to the commissioners a comparative statement, showing the estimated costs of different kinds of tunnels that might be built. A tunnel with cast iron lining would cost about \$116,000, while a tunnel of reinforced concrete block would cost about \$100,000. It is not expected that the construction of a tunnel will be undertaken for some time yet. It is one of the things on which Engineer Chipman is reporting.

This fur is all caught in Canadian territory and the trade which it represents should naturally belong to Canadian traders. The American traders cannot compete successfully with their American traders, because of the difficulties in the way of transportation in the Northwest territory. The present time it costs \$16. by the overland route to J. J. Jones, a hundred pound sack of flour at the mouth of the Mackenzie river, the cost of transportation being at the rate of \$25 per ton. Under these conditions, only the late successful life of can be taken into the north, but if transportation was easier a large market for many kinds of goods which have never been seen in the north would be found.

Getting More for Dollar.

The purchasing power of the dollar in the north is now greater than ever was before, says Mr. Cornwall, and the volume of freight taken into the north is increasing 100 per cent per annum. The question is as to how large a share of this trade can be secured for Edmonton is one which Mr. Cornwall believes to be of paramount importance to Edmonton and Alberta generally. Greatly improved transportation facilities are absolutely necessary if Edmonton is to get its share, and that share with the gradual and conservative development of the north country should amount to millions of dollars annually.

Would Double Trade.

The revenue increase in the fur trade has taken place around the delta of the Mackenzie and along the shores of the Arctic, both east and west from the delta. As an example of the trade that might be secured for Edmonton, Mr. Cornwall states that the number are waiting stores, but at the present time the only way that heavy goods of that description can be taken into the north and sold at a profit is by steamer via the Behring Straits.

The completion of the Edmonton and Durban railway to the Peace River will be of great assistance in facilitating trade in heavy goods to and from the north. As an example of the rapidity between House river and McMurtry, on the present route.

POLICE PETITION TO GO BEFORE COUNCIL

Major Short at Commissioner's Meeting States That in Matters Affecting Discipline in Any Department the Board of Commissioners Will Not Intervene.

"This petition of the dismissed police officers is one that affects matters of discipline, and that is one of the matters in which the commissioners do not intervene. In all questions of discipline, it is the duty of the chief of police to see that the discipline is maintained. Such was the dictum of Mayor Short this morning at a meeting of the board of commissioners. Commissioner Harrison and Chairman were not present, but the petition presented by former Inspector Wright and former Sergeant Edwards, came up in regular course of business. The petition, along with a statement from Inspector Wright, stated that he had had nothing to do with the dismissal of the men, was filed. Mayor Short remarked that the petition would also come before the city council."

CHALLENGED TO SWIM ACROSS THE CHANNEL

London, Aug. 29.—James Wolfe, the English swimmer, has challenged Henry Sullivan, the long distance swimmer, of Lovell, Mass., to a "swim across the channel" test for the championship of the world. Both men failed in their attempts. Wolfe, in his attempt to swim the English Channel, was forced to make another attempt across the channel against Wolfe.

CONFIRMS DESCHANBEAULT'S CLAIM TO THE DISCOVERY OF BLONDE ESKIMOS IN NORTH

J. K. Cornwall Returns to City After 5,000 Mile Trip Down the Mackenzie River to the Arctic and Overland to the Yukon. Says He Believes Northern Trapper Discovered Blonde Eskimos Before Stefansson.

Confirmation of the story of J. K. Deschanbeault, told in this morning's issue of the Bulletin, claiming that along with Joseph and William Hudson, was the first to discover the presence of Eskimos in the north, was confirmed today by J. K. Cornwall, president of the Northern Transportation Co., and one of the Northern Trappers, who has just returned from a trip through the Arctic circle extending over three months, in company with Ernest Horn, Chicago; B. K. Miller, Milwaukee; and A. J. Lewis, of the General Moving Picture Film Co. and George B. Fraser, Edmonton. The trip was made in the interest of the development of trade in the north and the bringing out of the life of the north as it is lived by the inhabitants. The party traveled over snow fields and during the trip took over 100 feet of moving picture film illustrating the life of the north and the life of the people who live there. Mr. Cornwall believes that the story of Deschanbeault that he and his companions discovered the blonde Eskimos

MAKE CONCESSIONS TO MEN

Vancouver, B.C., Aug. 29.—The railway company has made one or two concessions regarding working hours more favorable to the men than the finding of the arbitration board. It took a two-thirds majority to call a strike. A mass meeting was held at midnight when the arbitration finding was further discussed. Meetings were very quiet and orderly.

Expect Solicitor General

OTTAWA, Aug. 29.—Hon. Arthur Meighen, solicitor general, will arrive in the capital before the end of the week to assume the duties of his office. The interview was a private one but very satisfactory to the members of the cabinet. Dr. Meighen left for Banff in the afternoon.

GOT ALL THEY ASKED AND LITTLE MORE

So Federal Repugnance of Hancher Who Waited Upon Hon. Dr. Meighen, Minister of Interior. Meighen, Aug. 29.—It was a large delegation of members that waited upon Hon. Dr. Meighen, minister of the interior, yesterday morning. They were headed by President Galt, of the Provincial Trappers' Association, and among them were J. D. W. M.E.A., and Major John A. Simpson. The interview was a private one but very satisfactory to the members of the cabinet. Dr. Meighen left for Banff in the afternoon.

Four Thousand Dealers will Handle These Cars for the Season of 1914

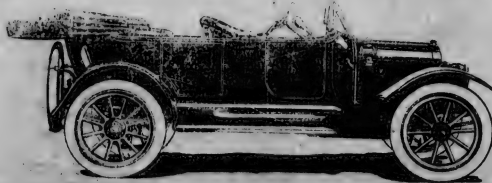

1914 Maxwell "50.6"—\$2700

The sweetest running thing on wheels: Six-cylinder motor, blue-cast, 53 h. p., 130-inch wheel base; electric starter and lights; Bruce Ott body; 5-7 passengers; disappearing seats; 36x4 1/2-inch tires all round. Luxuriously finished, long easy riding springs and full equipment, including ventilating windshield, top and jiffy curtains—even an electric cigar lighter. Left or right side drive optional.

1914 Maxwell "35.4"—\$1485—\$1675

Powerful, silent, sweet running; blue-cast four-cylinder motor; 111-inch wheel base; 33 x 4-inch tires all round. Left hand drive, centre control. Electric starter and lights, at \$1,075. Three-quarter elliptic springs; Bruce Ott body, ventilating windshield and full equipment, including jiffy curtains.

1914 Maxwell "25.4"—1025

The year's sensation. Four-cylinder, blue-cast, 25 h. p. motor; magneto; weight 1,000 pounds; 103-inch wheel base; 30 x 3 1/2-inch tires all round; 3 speed selective transmission; full five-passenger body, designed by Bruce Ott; complete equipment, including tire holders, ventilating windshield, top, jiffy curtains.

Maxwell Motor Company
Of Canada, Limited
Windsor, Ont.

THEY SAID—what did they say? What mattered what they said? They were competitors much perturbed—so what could they say? What must they say—being competitors—much perturbed?

4,000 DEALERS will handle Maxwell Motor Cars for the season of 1914. Season dated from August first—delivery at new prices now being made.

THAT'S OUR ANSWER to all they said. That tells the story. What is it they say about "he who laughs last?"

MAXWELL CARS WILL DOMINATE the trade for 1914 in the three big classes which command the greatest popularity.

THE FULL SIGNIFICANCE of the line "4,000 dealers," may not have occurred to you. It means, in a word, that we not only have the cars, the connoisseurs desire, but that we are now ready to manufacture them in numbers sufficient to supply the insistent demand.

YOUR DEALER SEEMS TO HAVE a kind of sixth sense when it comes to picking the winner in the selling field from season to season.

HE KNOWS: He has his finger on the pulse of the buyer, his eyes on the makers all the time. And he seldom guesses wrong. The successful dealer never—that's why he succeeds.

THIS IS A FAST-MOVING, quick-forgotten business. Watching it is like looking through a kaleidoscope. It is ever changing.

THE DEALER KNOWS—and you can't go wrong by following his lead for, you see, he is looking for the same things you are seeking—only from a different angle.

HE WANTS CARS that sell themselves. You never knew a dealer to go running for trouble, did you? Or looking for hard work?

NOT HE. HE FOLLOWS THE TREND of fashion in design, the progress of the science of metal-hurgy and manufacture. And when he sees a concern leading in these, he goes hot-foot after that line of cars.

WE HAVE CONCENTRATED our tremendous factory facilities; re-arranged and re-equipped the plants for economical production of automobiles in large quantities.

AND EACH MODEL WILL dominate its class—because a better car—better material, better workmanship and better finish for the same or less money.

DO YOU WONDER DEALERS are clamoring for the Maxwell line for 1914? They would belie their reputation for astuteness if they didn't.

WHY, LAST WEEK we shipped the first 50 cars of the Maxwell "35" Model to 50 points in the United States, and invited all dealers to come and see and try this wonderful car.

THEY CAME they saw and the new "35" Maxwell conquered. It was great to see their enthusiasm when the car, carrying five dealers aggregating 1010 pounds, sped up "Abbey Hill"—the steepest grade on Manhattan and a double-S turn—on high gear as if it were on the level.

OVER AND OVER AGAIN they put the car to the test—climbing the hill at all speeds down to 8 miles per hour on high gear—just a "puller" all the time.

BUT WE ARE DISMISSING—so enthusiastic about that wonderful "35" that we forgot our text for the moment. Let's discuss the entire line—for there isn't a dead one in it—no model that is a load on the others. Each is supreme in its class.

TAKE THE "50.6" for example—now thoroughly tried and proven. 1913 output all sold. Deliveries of 1914 model—left-hand drive with right side drive optional—begin August 1st. 1914 PRICE is \$2700.

THERE'S A LINE that will create consternation in the trade. They all expected it would be \$3200—in fact, we said so. That was the price we had decided on, but—

PERHAPS, YOU'VE NOTICED there's a wicked war on for supremacy in this class of car. We concluded that, so long as other makers had started it we would give them a real six at a real price and see how far they can go. Watch it—it will be interesting—and the buyer will be the beneficiary.

IT WILL BE UP to makers of \$4500—\$5000, yes, and \$6000 sixes to demonstrate wherein they give the difference in value.

AND WHAT ABOUT the manufacturer who stuck to four for one season too long? Having himself failed to progress he would stop all progress. He would sweep back the seas with his tiny whisk broom! He protests that folk will still pay \$2500 for four—and convinces no one but himself.

IN SEVEN-PASSENGER CARS the six is now supreme. It is not coming; it is here.

THEN THE MAXWELL "35"—This is, we firmly believe, the greatest car ever made in the so-called intermediate price class—a big five-passenger car for that class of buyer who wants all there is of comfort and power, at a price he can afford.

1914 PRICE is \$1485 without and \$1675 with electric starter and lights. Equal this if you can—in a car of anywhere near the quality.

BROADCAST MOTOR—fourth year unchanged. A motor such as you can't surpass in a \$2500 car. And all other features equally excellent. This car will lead—distance all others in its class, which is to say anything under \$2500.

AND FINALLY THE "25"—the car the trade has been talking about, looking for, waiting for.

IT IS HERE—WE ARE DELIVERING—and while we may not hope to supply all who want them, we will be able to appease 30,000 buyers during the next twelve months.

YOUR ENTHUSIASM will know no bounds when you see and ride in a "25."

THIS IS A REAL AUTOMOBILE—full 25 horse-power, blue-cast motor; 103 in. wheel base; same size tires all round, 30 x 3 1/2; full five-passenger body; 3 speed selective transmission; cone clutch; worm and sector steering gear; left-hand drive; centre-control; magneto—all the features of a high priced car.

AND AT A PRICE no other maker has ever before been able to produce such a car—1025 plus the freight.

THE RESULT OF MORE concentrated experience, engineering and metallurgical knowledge, manufacturing skill and financial resources than any other, this car justifies our efforts and fulfils our fondest hopes.

IT WAS DESIGNED to meet the ideas and the needs of tens of thousands of discriminating buyers—not beginners but experienced motorists—who must reward the price and yet who detest and decline to wear a uniform and are willing to pay a little more for a car that is a lot better.

WE WILL BUILD 30,000 of this model; 12,000 of the "35" and 2,000 to 3,000 of the Maxwell 50.6 in the next twelve months.

THAT'S SECOND LARGEST in the world—and still we are not satisfied. "Watch this Maxwell."
